FINCANTIERI YACHTS TECHNOLOGY OF BEAUTY

Fincantieri yachts are products of outstanding quality. It's the final result of a special synergy of advanced technical, design and construction capabilities, perfected over more than two centuries of experience building all types of oceangoing vessels. We infuse into every yacht the passion for quality and a keen eye for detail, stemming from the experience of generations of skilled engineers, craftsmen and leaders that are the Fincantieri team. They operate together in sophisticated yards like Muggiano supported by the world's finest yachting subcontractors. Vessels are designed and constructed with precision under the watchful eye of skilled project managers, combining the best design and production techniques with managerial expertise at the disposal of discerning owners who seek excellence, in an open and proactive interaction that is pleasant, flawless and rewarding.

A TIMELESS AESTHETIC WITHOUT COMPROMISE

This yacht embodies everything that my team and I believe in. With her sharp flowing lines combined with soft forms, and the signature H2 balconies dominating her profile, we believe that Mars is a most distinctive design with both longevity and elegance. This extraordinary design has been developed and fully engineered by the in-house team of engineers at Fincantieri. Their ability to work with a designer, respecting the spirit of the design, is key to Fincantieri's success at attracting owners who are looking for something truly unique. I firmly believe that "Good design is nothing without function" and I am happy to report that the engineers at Fincantieri believe in the same.
